## Professional Summary

Frontend engineer with expertise in HTML, CSS, JavaScript, React, Tailwind CSS, and backend technologies like Node.js, Express.js, MongoDB, SQL, Python, and Solidity. Passionate about Web3 and blockchain, I am dedicated to creating innovative and engaging user experiences. Currently expanding my knowledge in data science, I'm excited to explore opportunities and contribute to cutting-edge projects in the tech space. Let's connect and discuss how we can collaborate!

## Skills

- **Frontend Development:**  
HTML | CSS | JavaScript | React | Tailwind CSS
- **Backend Development:**  
Node.js | Express.js | MongoDB | SQL | Python
- **Blockchain Technology:**  
Solidity
- **Data Science:**  
Currently learning
- **Web3 Technologies:**  
Passionate about and actively exploring

## Certifications

- **Frontend Development Course**  
Family Computers
- **Blockchain Mastery Course**  
30 Days of Coding

- **Backend Mastery Course**  
30 Days of Coding

## Education

### Mechanical Engineering

Guru Gobind Singh College, 2021

## Projects

### Book Rental App

[GitHub Repository](#)

Developed a comprehensive book rental application as a frontend-only project, leveraging Tailwind CSS for a sleek and responsive design. The application enables users to browse an extensive catalog of books, view detailed book information, and manage their rental preferences with ease.

#### Key Features:

- **User Interface:** Designed an intuitive and visually appealing interface using Tailwind CSS, ensuring a responsive and user-friendly experience across devices.
- **Book Management:** Implemented features for users to search for books, view detailed descriptions, and manage their rental status.
- **State Management:** Utilized JavaScript for dynamic content updates and user interactions, enhancing the overall user experience.
- **Design Focus:** Prioritized clean, modern aesthetics and seamless navigation to ensure users can efficiently browse and manage their book rentals.

#### Technologies Used:

- **Frontend:** HTML, CSS, JavaScript, Tailwind CSS

This project demonstrates my ability to create functional and aesthetically pleasing web applications, emphasizing both frontend development skills and attention to user experience.
